Rational Randomness: The role of sampling in an

Hume's account of rational and irrational reasoning 1. Empirical reasoning consists in the inference of one matter of fact or real existence from another. If I believe X to be the case and X gives me reason to believe Y, then I can infer that Y is the case. On Hume's analysis, this is just to say

Hume's account of rational and irrational reasoning

limits of the standard rational choice conception of the individual. This essay proceeds as follows. Section 2 introduces the Freudian conception of the individual in the context of coordination problems. Section 3 contrasts a rational choice and a Freudian account of sharing. Section 4 discusses the costs of cooperation from a Freudian perspective.
