Spinal manipulative therapy (SMT) is an intervention that is widely practiced by a variety of health care professionals worldwide. The effectiveness of this form of therapy for the management of chronic low-back pain has come under dispute.. Low-back pain is a common and disabling disorder, which represents a great burden to the individual and society. It often results in reduced quality of ...

Spinal manipulative therapy for chronic low-back pain

Since art therapy is a visual and sensory modality, it can help clients access traumatic material stored in implicit memory, a sensory, body-based form of memory that is not the same as conscious, narrative memory (what we usually think of as "memory"). Sound- and body-based approaches can also ...

Injection therapy is one of many treatments available for patients with subacute (longer than six weeks) and chronic (longer than 12 weeks) low-back pain. Where the injection is given, what drug is used and why the injection is given can all vary. The injection can be given into different parts of the spine (the space between the vertebrae, around the nerve roots, or into the disc), ligaments ...

Injection therapy for subacute and chronic low-back pain

Massage is to work and act on the body with pressure. Massage techniques are commonly applied with hands, fingers, elbows, knees, forearms, feet, or a device. The purpose of massage is generally for the treatment of body stress or pain.
