A software development methodology is a framework that is used to structure, plan, and control the life cycle of a software product. Common methodologies include waterfall, prototyping, iterative and incremental development, spiral development, agile software development, rapid application development, and extreme programming.. The waterfall model is a sequential development approach; in ...

Best coding practices - Wikipedia

In the wake of a disaster, people often wonder if there is anything they can do to protect their family and property from the effects of such devastating losses. Hazard mitigation is the way to provide that protection. Mitigation means taking action now to reduce or prevent future damage later. There are three important elements to help reduce the impact of disasters on our
