The history of biochemistry can be said to have started with the ancient Greeks who were interested in the  
composition and processes of life, although biochemistry as a specific scientific discipline has its beginning  
around the early 19th century. Some argued that the beginning of biochemistry may have been the discovery  
of the first enzyme, diastase (today called amylase), in 1833 by Anselme ...

Health effects Relation to diet. Although certain levels of antioxidant vitamins in the diet are required for good health, there is still considerable debate on whether antioxidant-rich foods or supplements have anti-disease activity. Moreover, if they are actually beneficial, it is unknown which antioxidants are health-promoting in the diet and in what amounts beyond typical dietary intake.
