

black hole 3 pdf

A black hole is a region of spacetime exhibiting such strong gravitational effects that nothingâ€”not even particles and electromagnetic radiation such as lightâ€”can escape from inside it. The theory of general relativity predicts that a sufficiently compact mass can deform spacetime to form a black hole. The boundary of the region from which no escape is possible is called the event horizon.

Black hole - Wikipedia

In physics, black hole thermodynamics is the area of study that seeks to reconcile the laws of thermodynamics with the existence of black-hole event horizons. As the study of the statistical mechanics of black-body radiation led to the advent of the theory of quantum mechanics, the effort to understand the statistical mechanics of black holes has had a deep impact upon the understanding of ...

A giant black hole ripped apart a nearby star and then continued to feed off its remains for close to a decade, according to research led by the University of New Hampshire. This black hole meal ...

Researchers discover a black hole feeding frenzy that

An intermediate-mass black hole might be lurking within a dense stellar cluster â€” a discovery that could point toward how these oddities form.

Best Evidence Yet for an Intermediate-Mass Black Hole

I like this line of thinking. As mater and space gets closer to a black hole in our universe the time slow to an infinitely slow speed (... a virtually a time stop to us at the event horizon).

Theorists apply loop quantum gravity theory to black hole
