As a follow-up to Tuesday's post about the majority-minority public schools in Oslo, the following brief account reports the latest statistics on the cultural enrichment of schools in Austria. Vienna is the most fully enriched location, and seems to be in roughly the same situation as Oslo. Many thanks to Hermes for the translation from Unzensuriert.at:

William Lane Craig is a prolific Christian philosopher, apologist, author, and public debater. He is the best debater â€“ on any topic â€“ that I've ever heard. As far as I can tell, he has won nearly all his debates with atheists. When debating him, atheists have consistently failed to put forward solid arguments, and consistently failed to point out the flaws in Craig's arguments.

Most people don't care when a carpenter cuts a board wrong though, or when a concrete truck is loaded with fewer yards than ordered. That's because, for most of us, the cost of failure doesn't involve death as a constant.

The EIA has apparently stopped publishing its International Energy Statistics. Instead they are now publishing an abbreviated version on their Total Energy web page titled: Tabel 11.1b World Crude Oil Production. Here they publish crude + condensate production numbers for Persian Gulf Nations, Selected Non-OPEC Countries, Total Non-OPEC and World.

First, some background: last year I wrote a review of The Sense of an Ending by Julian Barnes. I had a lot of comments from people who didn't understand the ending, and since then I've been inundated with people searching for things like "Sense of an Ending explained".

I came across an interesting statistic recently; 25% of relationships that start as affairs succeed. "Succeed" is defined as the couple staying together, rather than by the quality of the relationship.
