The current study draws on survey data from 1234 U.S. early childhood educators working with children 0-4 years of age collected from a larger online survey of 1457 early childhood educators serving children ages 0-8 conducted in the fall of 2012.

Factors influencing digital technology use in early

Attachment in children is "a biological instinct in which proximity to an attachment figure is sought when the child senses or perceives threat or discomfort. Attachment behaviour anticipates a response by the attachment figure which will remove threat or discomfort". Attachment also describes the function of availability, which is the degree to which the authoritative figure is responsive to ...
