A Child's World: Infancy Through Adolescence 13th Edition

In human biology, handedness is a better, faster, or more precise performance or individual preference for use of a hand, known as the dominant hand; the less capable or less preferred hand is called the non-dominant hand. Men are somewhat more likely to express a strongly dominant left hand than women. It is estimated that between 70 and 95 percent of the world's population is right-handed.
