Mastering Python Data Visualization: Kirthi Raman

Data mining is the process of discovering patterns in large data sets involving methods at the intersection of machine learning, statistics, and database systems. Data mining is an interdisciplinary subfield of computer science with an overall goal to extract information (with intelligent methods) from a data set and transform the information into a comprehensible structure for further use.

A collaborative BIM project is not a simple undertaking. This is especially true if the project in question is a large facility (e.g. a high-rise building or a major hospital), the project participants lack the necessary experience, or the BIM requirements are not clearly defined.

BIM ThinkSpace: BIM

BIM Excellence (BIMe) is a unique research-based approach to digital innovation in the construction industry. It offers an integrated methodology and a modular language for performance assessment, information management, learning and process optimisation.
