EPA sets limits on environmental radiation from use of radioactive elements. The Radiation Protection website describes EPA's radiation protection activities, regulations and supporting information.

Radiation Protection | US EPA

Abstract: We consider an attraction-repulsion chemotaxis model coupled with the Navier-Stokes system. This model describes the interaction between a type of cells (e.g., bacteria), which proliferate following a logistic law, and two chemical signals produced by the cells themselves that degraded at a constant rate.

The Canny edge detector is an edge detection operator that uses a multi-stage algorithm to detect a wide range of edges in images. It was developed by John F. Canny in 1986. Canny also produced a computational theory of edge detection explaining why the technique works.

Over the past two decades, state-building has developed into becoming an integral part and even a specific approach to peacebuilding by the international community. Observers across the political and academic spectra have come to see the state-building approach as the preferred strategy to peacebuilding in a number of high-profile conflicts, including the Israeli-Palestinian, Bosnia, Iraq, and ...

The First Time Designer's Guide is a basic overview of Intel embedded development process and tools for the first time user. The chapter provides information about the design flow and development tools, interactions, and describes the differences between the Nios II processor flow and a typical discrete microcontroller design flow.

1.1 Package structure. The sources of an R package consists of a subdirectory containing a files DESCRIPTION and NAMESPACE, and the subdirectories R, data, demo, exec, inst, man, po, src, tests,

tools and vignettes (some of which can be missing, but which should not be empty). The package subdirectory may also contain files INDEX, configure, cleanup, LICENSE, LICENCE and NEWS.

Writing R Extensions

Protection from the high impedance fault (HIF) has been one of the biggest challenges in the power distribution network. HIF typically occurs when the conductors in distribution network break and touch the ground surface; or lean and touch a tree branch.

High impedance fault detection: A review - ScienceDirect

SyNAPSE is a DARPA-funded program to develop electronic neuromorphic machine technology that scales to biological levels. More simply stated, it is an attempt to build a new kind of computer with similar form and function to the mammalian brain. Such artificial brains would be used to build robots whose intelligence matches that of mice and cats.

1. Introduction. In recent years, big data has rapidly developed into a hotspot that attracts great attention from academia, industry, and even governments around the world , , . Nature and Science have published special issues dedicated to discuss the opportunities and challenges brought by big data , . McKinsey, the well-known management and consulting firm, alleged that big data has ...

Significance and Challenges of Big Data Research

Since 2016, RuhrSec is the annual English speaking non-profit IT security conference with cutting-edge security talks by renowned experts. The conference is hosted at the Ruhr-University Bochum in Germany, directly in the heart of Bochum near the river Ruhr.

This post is based on a presentation I gave in Hong Kong for Chain of Things and also one for the Scotland Blockchain meetup. This was inspired by a recent whitepaper I co-authored with Gilbert & Tobin. Since a blockchain/shared ledger is a network of nodes all coming together to share information and work together on different use cases a consortium model makes sense to deploy.

SAMMANTICS

Quote HSE " Success in managing major Hazards is not measured by the Occupational Health and Safety Statistics but by measuring the performance of critical systems used to control risks to ensure they are operating as intended.. This statement is a very powerful statement and i want to stand on the premise that it should form the basis of assessing and formulating regulation regimes.

Gaussian Processes and Kernel Methods Gaussian processes are non-parametric distributions useful for doing Bayesian inference and learning on unknown functions. They can be used for non-linear regression, time-series modelling, classification, and many other problems.
