Electropolishing, also known as electrochemical polishing, anodic polishing or electrolytic polishing (especially in the metallography field), is an electrochemical process that removes material from a metallic workpiece. It is used to polish, passivate, and deburr metal parts. It is often described as the reverse of electroplating. It may be used in lieu of abrasive fine polishing in ...

Chemistry Sets and Other Tools of the Devil. Mr. Gilbert had a very strong belief in the educational value of Science Kits. He felt that a wide variety of educational toys could bring out the engineer or scientist in any Boy and made a very broad array of kits to offer something that would have a special resonance with The Boy.
