Environmental Science and Pollution Research (ESPR) serves the international community in all areas of Environmental Science and related subjects with emphasis on chemical compounds. It reports from a broad interdisciplinary ...

### **Environmental Science and Pollution Research - incl**

Environmental science is an interdisciplinary academic field that integrates physical, biological and information sciences (including ecology, biology, physics, chemistry, plant science, zoology, mineralogy, oceanography, limnology, soil science, geology and physical geography ( ), and atmospheric science) to the study of the environment, and the solution of environmental problems.

### **Environmental science - Wikipedia**

Pollution is the introduction of contaminants into the natural environment that cause adverse change. Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.

We summarize past examples of the use of science to document the effectiveness of policy in air quality  
management. Our goal is to inform public discourse amidst attempts to negate the relevance and value of  
scientific data and fact-based analysis in favor of partisan opinion and ideology.

Environmental Awareness - Naturalist Intelligence Environment is the area in which we live and share. The  
thin layer of air that surrounds our planet that supports life. Humans are the only kind of life that we know of  
that exists in our universe. If we did not have our environment we could not exist.
