

goode differential equations and pdf

John Forbes Nash Jr. (June 13, 1928 – May 23, 2015) was an American mathematician who made fundamental contributions to game theory, differential geometry, and the study of partial differential equations. Nash's work has provided insight into the factors that govern chance and decision-making inside complex systems found in everyday life.. His theories are widely used in economics.

As Figure 1 depicts, the important variables of this research include brand equity as the independent variable, consumer satisfaction as the mediating variable, and brand loyalty as the dependent variable. Keller (1993, p. 7) refers to brand equity as "the differential effect of brand knowledge on customers' response to the marketing of a brand".

Brand equity, brand loyalty and consumer satisfaction
