

**handbook of elliptic integrals pdf**

Elliptic Integrals are said to be 'complete' when the amplitude  $\phi = \pi / 2$  and therefore  $x = 1$ . The complete elliptic integral of the first kind  $K$  may thus be defined as  $K = \int_0^{\pi/2} \frac{1}{\sqrt{1 - k^2 \sin^2 \theta}} d\theta$ , or more compactly in terms of the incomplete integral of the first kind as
