The little penguin (*Eudyptula minor*) is the smallest species of penguin. It grows to an average of 33 cm (13 in) in height and 43 cm (17 in) in length, though specific measurements vary by subspecies. It is found on the coastlines of southern Australia and New Zealand, with possible records from Chile. In Australia, they are often called fairy penguins because of their small size.

A blue box is an electronic device that generates the in-band signaling audio tones formerly used to control long-distance telephone exchanges. By generating the same tones employed by a telephone operator's dialing console, a blue box user could route their own calls and bypass the normal toll collection by the telephone company. Developed in the 1960s, the most typical use of a blue box was ...
