Technical Reports | Department of Computer Science

Heart rate variability (HRV) is the physiological phenomenon of variation in the time interval between heartbeats. It is measured by the variation in the beat-to-beat interval. Other terms used include: "cycle length variability", "RR variability" (where R is a point corresponding to the peak of the QRS complex of the ECG wave; and RR is the interval between successive Rs), and "heart period ...

Dose-response curve. A dose-response curve is a simple X-Y graph relating the magnitude of a stressor (e.g. concentration of a pollutant, amount of a drug, temperature, intensity of radiation) to the response of the receptor (e.g. organism or population under study). The response may be a physiological or biochemical response, or even death (mortality), and thus can be counts (or ...

Chapter1 Overview 1.1 AboutKubiosHRV

KubiosHRV is an advanced tool for studying the variability of heart beat intervals. Due to its wide variety of different analysis options and the easy ...

KubiosHRV - Heart Rate Variability Analysis Software

The active ingredient, cisplatin, is a yellow to orange crystalline powder with the molecular formula PtCl₂.H₂N₂. and a molecular weight of 300.1.

PLATINOL - Food and Drug Administration

CCA is a powerful, easy to use method for multichannel data analysis. CCA finds an optimal linear model to relate stimulus and brain response.

Progression Models in Resistance Training for Healthy Adults ... a

Progression Models in Resistance Training for Healthy Adults

The term "tipping point" commonly refers to a critical threshold at which a tiny perturbation can qualitatively alter the state or development of a system. Here we introduce the term "tipping element" to

describe large-scale components of the Earth system that may pass a tipping point. We ...

Tipping elements in the Earth's climate system | PNAS

16 Dissolution Technologies | FU 2016 Saranadasa (14) suggested a model-independent method under the assumption that the reference and test dissolution curves are parallel – one overlaps with the other after an upward or downward shift of d.A maximum

In Vitro Dissolution Curve Comparisons: A Critique of

Seeing old friends in a new light: A divergent synthesis of quinine and quinidine (see structures) was designed on the basis of a symmetrical and nonstereogenic intermediate, conceptually different from the stereodefined piperidine precursors used in past syntheses. Complementary late-stage local desymmetrization reactions were developed to access the two targets.

JNN is a multidisciplinary peer-reviewed journal covering fundamental and applied research in all disciplines of science, engineering and medicine.

Journal of Nanoscience and Nanotechnology

Gaussian Processes and Kernel Methods Gaussian processes are non-parametric distributions useful for doing Bayesian inference and learning on unknown functions. They can be used for non-linear regression, time-series modelling, classification, and many other problems.
