Metaphysics is the branch of philosophy that examines the fundamental nature of reality, including the relationship between mind and matter, between substance and attribute, and between possibility and actuality. The word "metaphysics" comes from two Greek words that, together, literally mean "after or behind or among the [study of] the natural".

Metaphysics (Greek: *Μεταφυσικά*; Latin: *Metaphysica*) is one of the principal works of Aristotle and the first major work of the branch of philosophy with the same name. The principal subject is "being qua being," or being insofar as it is being. It examines what can be asserted about any being insofar as it is and not because of any special qualities it has.

Anamnesis Anamnesis means remembrance or reminiscence, the collection and re-collection of what has been lost, forgotten, or effaced. It is therefore a matter of the very old, of what has made us who we are. But anamnesis is also a work that transforms its subject, always producing something new.
