Tetrachromacy is the condition of possessing four independent channels for conveying color information, or possessing four types of cone cell in the eye. Organisms with tetrachromacy are called tetrachromats. In tetrachromatic organisms, the sensory color space is four-dimensional, meaning that to match the sensory effect of arbitrarily chosen spectra of light within their visible spectrum ...

Color (American English), or colour (Commonwealth English), is the characteristic of human visual perception described through color categories, with names such as red, orange, yellow, green, blue, or purple. This perception of color derives from the stimulation of cone cells in the human eye by electromagnetic radiation in the visible spectrum. Color categories and physical specifications of ...

Would you like to improve your Pinterest presence? Do you want to learn about some of the latest Pinterest statistics and how to use them to get more repins, Likes, clicks and sales? Are you tired of reading the same old Pinterest statistics? Most Pinterest infographics I come across mainly emphasize on how much Pinterest users make and how more men are joining the network.
