Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.

File sharing on developerWorks lets you exchange information and ideas with your peers without sending large files through email. You can browse public files, files associated with a particular community, and files that have been shared with you. You can upload files of your own and specify who may view those files. You can also pin files to keep them handy.
