SAMPLE RISK MANAGEMENT PLAN (RMP) - KDHE

Risk is the potential of gaining or losing something of value. Values (such as physical health, social status, emotional well-being, or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen (planned or not planned). Risk can also be defined as the intentional interaction with uncertainty.

Adverse Childhood Events as Risk Factors for Negative

Controversies about risks to public health regularly hit the news, whether about food safety, environmental issues, medical interventions, or “lifestyle” risks such as drinking. To those trying to manage or regulate risks, public reactions sometimes seem bizarre. To the public, the behaviour of those supposedly “in charge” can seem no less odd.

Risk Communication and Public Health - Oxford Scholarship

In psychology, stress is a feeling of strain and pressure. [citation needed] Stress is a type of psychological pain. Small amounts of stress may be desired, beneficial, and even healthy. Positive stress helps improve athletic performance. It also plays a factor in motivation, adaptation, and reaction to the environment. Excessive amounts of stress, however, may lead to bodily harm.

Effective systematic management of risks improves worker health and safety, as well as productivity. Eliminating health and safety risks. The model WHS Act and Regulations require those who have a duty to ensure health and safety, achieve it by eliminating health and safety risks, so far as is reasonably practicable.. We strongly encourage businesses to strive to go beyond minimum compliance.
