Collier Soil and Water Conservation District

Water Quality. Excess nutrients in runoff are a major threat to water quality. When it rains, the rain can cause erosion, pick up nutrients and chemicals, and run off into our waterways.

Soil and Water Conservation - dcr.virginia.gov

Supporting Conservation by Providing Resources and Knowledge. Fairbanks Soil & Water Conservation District promotes sustainable land development and works with private landowners to address their natural resource concerns.

Fairbanks Soil and Water Conservation District

Soil conservation is the preventing of soil loss from erosion or reduced fertility caused by over usage, acidification, salinization or other chemical soil contamination.. Slash-and-burn and other unsustainable methods of subsistence farming are practiced in some lesser developed areas. A sequel to the deforestation is typically large scale erosion, loss of soil nutrients and sometimes total ...

The State of the World's Land and Water Resources for Food and Agriculture This flagship report analyses a variety of options for overcoming constraints and improving resource management in areas of heightened risk.

Land & Water - Food and Agriculture Organization

The rate and quantity of evaporation from the soil surface is a complicated process affected by many soil characteristics, tillage and environmental interactions (Lal & Shukla, 2004). Under conservation tillage, higher water content in the topsoil and more plant residues on the soil surface, resulting in declined evaporation, have been linked with the lower soil temperature (Rasmussen, 1999).

Conservation tillage impacts on soil, crop and the
