Income inequality in the United States has increased significantly since the 1970s after several decades of stability, meaning the share of the nation's income received by higher income households has increased. This trend is evident with income measured both before taxes (market income) as well as after taxes and transfer payments. Income inequality has fluctuated considerably since ...

Georgism, also called geoism and single tax (archaic), is an economic philosophy holding that, while people should own the value they produce themselves, economic value derived from land (including natural resources and natural opportunities) should belong equally to all members of society. Developed from the writings of the economist and social reformer Henry George, the Georgist paradigm ...

Georgism - Wikipedia

Highlights This paper reviews the research in accounting for income taxes. We conclude that: Managers use the tax accounts to manage earnings to meet or beat analysts' forecasts. A few studies document associations between book-tax differences and earnings characteristics. It is unclear whether the market prices the information.
