Statistics on rape and other sexual assaults are commonly available in industrialized countries, and are becoming more common throughout the world. Inconsistent definitions of rape, different rates of reporting, recording, prosecution and conviction for rape create controversial statistical disparities, and lead to accusations that many rape statistics are unreliable or misleading.

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...
