Health, as defined by the World Health Organization (WHO), is "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity." This definition has been subject to controversy, as it may have limited value for implementation. Health may be defined as the ability to adapt and manage physical, mental and social challenges throughout life.

27th October 2017 As readers of this blog will know, for many years I have pursued the idea that "stress" was the primary cause of cardiovascular disease. Actually, it is strain. Stress is the force applied, strain is the effect that stress produces. For the sake of simplicity, I will just use the word stress.
