

structural complexity i 2nd pdf

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

Language complexity is a topic in linguistics which can be divided into several sub-topics such as phonological, morphological, syntactic, and semantic complexity. The subject also carries importance for language evolution. Although the concept of language complexity is an old one, the current interest has largely emerged since the beginning of the 21st century as it was previously considered ...
