Generation Z or Gen Z, also known by a number of other names, is the demographic cohort after the Millennials (Generation Y). Currently, there are numerous additional competing names used in connection with them in the media. There are no precise dates for when this cohort starts or ends, but demographers and researchers typically use the mid-1990s to mid-2000s as starting birth years.

### **Generation Z - Wikipedia**

Generation X or Gen X is the demographic cohort following the baby boomers and preceding the Millennials. There are no precise dates for when Generation X starts or ends. Demographers and researchers typically use birth years ranging from the early-to-mid 1960s to the early 1980s.

With this result in hand, we then decided to investigate the effect of catalyst concentration on reaction conversion. The modified Friedländer reaction was carried out in DMF at 70 °C, using two equivalents of 2-aminobenzyl alcohol, in the presence of KOH as the base, at 1 mol%, 3 mol%, and 5 mol% Cu(BDC) catalyst, respectively. It was found that the reaction proceeded readily in the presence ...

The United Statesâ€™ long-standing vaccine safety program closely and constantly monitors the safety of vaccines. A critical part of the program, CDCâ€™s Immunization Safety Office identifies possible vaccine side effects and conducts studies to determine whether health problems are caused by vaccines.. Data show that the current U.S. vaccine supply is the safest in history.

Importance Epidemiological evidence suggests that physical activity benefits cognition, but results from randomized trials are limited and mixed.. Objective To determine whether a 24-month physical activity program results in better cognitive function, lower risk of mild cognitive impairment (MCI) or dementia, or both, compared with a health education program.
