Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

The history of modern Japanese migration begins near the end of the 19th century. In 1868, Japanese isolation from the world was broken which prompted large scale social and economic upheaval, with the Japanese government encouraging emigration. These emigrants included those from Okinawa, who fled oppression by the Japanese government after the island was taken over in 1878.

This chapter examines the role of China in the Cold War. It describes the origins of Cold War in China and the participation of nationalist China in World War 2 and the Cold War, and suggests that China played a pivotal role as the third (albeit shorter) leg of a cold war tripod. The chapter contends that the Cold War era in China is inseparable from the political supremacy Mao Zedong, and ...

"Fake news" is a key subject of data politics, but also a tricky a one. As this chapter aims to show, various phenomena signified by this misleading label have little in common, except being opposite to the kind of algorithmic intelligence that most other chapters present as the main concern of data politics.
