The process will be evaluated against the 5 levels of Software Process Maturity as defined by the Software Engineering Institute. The major aspects levels 2-4 will be assessed. (There are no processes in level 1 and level 5 is beyond the scope of this proposal). The following breakdown lists questions that will be addressed at each level. 2.1.

Software Engineering Processes In order for software to be consistently well engineered, its development must be conducted in an orderly process. It is sometimes possible for a small software product to be developed without a well-defined process. However, for a software project of any substantial size, involving more than a few people, a
